

Ester Mabel Silva Santos

Flutter Software Engineer

I am a Software Engineering student and Flutter Developer with +2 years of experience in developing hybrid applications and with a passion for designing and developing beautiful, modern and accessible interfaces.

EXPERIENCE

Flutter Developer

CatSkilllet

Dec 2020 – Present, Brazil

I was part of the development team of 2 projects: [Tismoo.me](#) and [ASP](#). I was responsible for building screens following a pre-defined design, refactoring and maintaining code, making API integrations and developing features.

Project Manager | Flutter Developer

CalmExperts

Feb 2021 – Mar 2021 – Canada

Not only was I part of the Buffet development team, making use of geolocation packages and maps, but I also managed the Finance project. I worked on my leadership skills, being responsible for a complete team. I did the distribution of tasks, code review and was in direct contact with the customer to better capture their vision for the project and make the necessary changes to meet them.

Flutter Developer

Ache Imóveis

Oct 2020 – Jan 2021 – Brazil

In the [Ache Imóveis](#) app I was responsible for creating and designing the entire user interface (UI) of the application and its user experience (UX). In addition to being responsible for developing screens, flows and features using Flutter.

TI Internship

Sicoob Cooperbom

Aug 2020 – Dec 2020 – Brazil

Responsible for developing WEB systems using PHP, with CodeIgnitor framework along with the use of HTML/CSS/JS. The systems in question were mostly aimed at administration and internal use of employees. I was also responsible for creating, manipulating and administering tables in the database, using the MySQL database language.
